**Object : Reconstruction project of athletic tracks, Sports Complex
Mont Bleu- Gatineau Qc.**

Dear Sir,

I am pleased to share with you our great satisfaction concerning the services and products supplied to us by your company.

Having the finals of the Quebec Games in the city of Gatineau, during the months of July and August 2010, has been a privileged occasion for us to welcome over 4000 youths and their tutors in an atmosphere of competition, sharing and friendship.

Obviously, our sports installations had to be up to standards. Among other things, the reconstruction of our athletics infrastructure (400m tracks, long jump, high jump, pole vaulting, etc) has been a big challenge and a large scale project.

To this end, I insist on emphasizing the professionalism of your team during the installation of the synthetic layer ALSATAN SC, the quality of the product, as well as the precision of the work of lining for all the various events categories. At the same time, I would like to take the opportunity to thank you for your on-going and full collaboration through the entire project, as well as your total implication. And this regardless of the tight deadline which was required to complete the site in time for the events. This was greatly appreciated.

The games took place and were a total success because of partners like you. The legacy of this high quality facility in our city can only encourage citizens and organizations in their quest for excellence.

Many thanks again to you and all your teams.

Regards,
