RE : Synthetic surface installation at Centre Multisport in Gatineau

Mr. Caron,

As CEO of ARSO, I want to personally thank you and your team for the work completed at the Centre multisport during the month of May.

I also want to thank Mr. Marco Bernier, operations director, and Mr. Stéphane Ranger, site manager, who have collaborated closely with us since September 2010 in order to complete this project.

The installation of the two fields required complex logistics, considering the fact that work was taking place in a building with restricted access for the equipment involved.

Carpell Surfaces' installation team demonstrated professionalism and competence. I am very happy with the results and I am sure that our players will be thrilled to play on these new synthetic turf fields.

Yours Sincerely,

Richard Gravel
