To Whom It May Concern:

RE: Carpell Surfaces

In 2010 the City of Thunder Bay undertook a complete rehabilitation of the Fort William Stadium.

The work included replacement of the original natural turf field with a new artificial turf (Mondo 3NX) field. Carpell Surfaces was responsible for the supply and installation of the turf surface. They were excellent to work with and provided great customer service.

The turf field provided our minor and high school football program with a first class venue on which to showcase their talent.

I would have no trouble recommending Carpell Surfaces to anyone considering an artificial turf supplier/installer.

Yours truly
